We know some species which existed million years ago, but we may not find them now. They might be extinct and some of them may be found in the form of fossils. The scientists got evidence of presence of Dinosaurs like animals in the form of fossils.

**Instructions:**

- I. Answer all of the following questions
- II. Each question carries ½ marks
- III. Answer to be written in question paper only.
- IV. Marks will not be awarded in case of overwriting, rewriting and erased answers.

18. What does XY represent in human chromosome configuration? ( . )
- A. Human sex cell representing a male.
  - B. Human sex cell representing a female.
  - C. Any animal sex cell representing a male
  - D. Any animal sex cell representing a female.
19. The element which we found in chlorophyll as to iron in haemoglobin. ( . )
- A. Cu
  - B. Fe
  - C. Ca
  - D. Mg
20. The surface area of small intestine is coiled due to. ( . )
- A. Cristae
  - B. Micro-villi
  - C. Mucous gland
  - D. Cilia
21. We call it the currency of energy. ( . )
- A. NADP
  - B. ADP
  - C. ATP
  - D. All of these
22. We can measure systolic and diastolic pressure of a human being with a ( . )
- A. Monometer
  - B. Anaemia monometer
  - C. Sphygmomanometer
  - D. None of these.
23. The alkaloid used to cure malaria ( . )
- A. Quinine
  - B. Reserpine
  - C. Nicotine
  - D. Caffeine
24. The world with living organisms is called. ( . )
- A. Ecosystem
  - B. Lithosphere
  - C. Food web
  - D. Biosphere
25. This is not a fossil fuel. ( . )

- A. CNG
  - B. LPG
  - C. Kerosene
  - D. Solar energy
26. If a spermatozoan doesn't have tail, then ( . )
- A. Sperm cell become feeble
  - B. Fertilisation will not take place
  - C. Mitochondria will not function
  - D. Both A and B
27. Which of the following is referred as sunshine vitamin. ( . )
- A. Calciferol
  - B. Biotin
  - C. Retinol
  - D. Ascorbic acid
