Vision & Mission

'Education is the best gift that a parent can give to a child' - A 'Hadith
"The best gift from a father to his child is education and upbringing."
Hadith of At-Tirmidhi on the Authority of Sa'id Ibn Al-'As.

*"No father has given a greater gift to his children
than good moral training." [Tirmidhi].*

Our vision is to help every individual get equipped to
give this gift to their child which in turn would serve the
purpose of our mission ie ; a society which steels a strong
fabric in the form of educated and progress minds.

To help this take a shape we offer modern education in
the light of Islam. While meritorious student are our one
of the fraction of the institutions ,strength, the nucleus
being the most deserving coming from lowest strata of
the ignorant group of India.

With this visualize a utopia kind of community and
country, if not sooner; later.

Value Addition

Creative analysis: Analysis can be a part of the creative process. If it provides insights that lead to better choices. Here are four rules:

- ◆ Question the Question
- ◆ Analyzing the data
- ◆ Noting down the exceptions
- ◆ Clearly demonstrate the facts

The current generation are now at a juncture to imbibe variables that come from different spheres. It is tough for them to do so, if creative analysis takes a miss from the learning process.

The child, irrespective of its intention becomes a part of the traditional method learning owing to the existing scenario. It provides no room for aptitude. If children are caught young. We create a bracket that can lay platform for creative analysis which in turn would make even huge concepts easy

Memory Development

The fast paced technological improvements are many that through a challenge to young minds with their ever changing developments to be learnt retained and then reproduced as to match oneself to this swiftly transforming fields. This demands a well developed memory; so that it conveniently accommodates the facts and features of the surroundings the kind of importance memory has in man's life, we adopt techniques advocated by education psychologists to inculcate certain patterns this is done at a very young age as children within the age group of 3 – 7years are the best of learners, if world wide psychologist's theories are to be believed.

New age approach

With technology influencing every sphere of life, rote memory has completely lost its face due to its unyielding results. Here we initiated to a revamped approach towards learning. Keeping the values intact, we take the process multi – media and various other methods like getting the child nearer to the nature where it can gain first hand experience. It also helps first – generation learners to a great extent.

We also tap the need of the children and also create new abilities through a planned curriculum which polishes the child through all streams. This in turn would definitely empower the child with self identification the child learns how to unleash the barriers in the path of conceptual learning.

5

Personality Development:

The personality is the typical patterns of thinking feelings, and behaviors that make a person unique personality can be improved beyond any bounds. A well developed personality is a gift to the society & the whole world, where as an under developed personality can give in to the pitfalls they come across in their life.

At M.S. we believe the personality development to be an integral part of our lives. In the light of hadith & the Holy Quran, we strive to mould our children into well balanced citizens of the world. Yes! Not just the citizens of a nation or a state. We impart human values in the highest form by creating an environment of positive attitude, integrity, empathy, passion, truth, sincerity & equality.

We develop in our students the curiosity to learn by questioning following their interest & passion we teach them to see the holistic view of things & empower them to think wisely. We conduct Quiz & Contests as a measure to check these values in class as well as for the whole school as a unit.

Career Guidance

“Well begun is half done” is a famous saying that holds good with our procedure of helping the child. When child reaches a stage of self identification, it rounds up the innate abilities . A child's inclination towards a field can easily be assured once this is done. We identify this mental bent & provide ample guidance , encouragement to hone the talent & interest into impeccable skills.

We conduct various subject based skill tests & also encourage & prepare our students for competitive exams. We counsel them & expose them to the career ladder for them to realize that an early stride towards their career is a must M.S. has produced amazing results through its career guidance. We teach our students how to get the optimum of their efforts through focused moves & time management.

We do not teach our students, but, show them how to learn.

Field Trips

Students are taken on frequent field trips to definite places that correspond to the concepts to be taught to them. Coming close to nature, they learn the lessons that can almost ensure a lifetime's retention. More over they could flawlessly apply the gained knowledge in their day-to-day life.

8

Pedagogy: Teaching Methodology, Practical learning.

Methodologies of teaching vary according to not only the subject but also its sects. An apt method applied ensures that the hypothesis comes out in true sense. Practical learning or heuristic method is added to this which act as a catalyst in the whole process. This method also ensures that the child remains the nucleus. Abstract concepts are also well understood with this method in progress.

The source of this method is however not new. Method of learning by doing is a way that has been strictly emphasized by Islam. In fact it is the right kind of perceiving an aspect. By doing so, we automatically are applying the foolproof method in the teaching – learning process.

Environment -Etiquettes, Discipline , Values

Environment strangely has contagious quality which inevitably spreads its vibes to people around. Man being very good at imitation, naturally is effected by his immediate surroundings. Taking advantage of this pulse, we serve an environment that is a perfect blend of etiquettes, discipline and values in the desired proportion. In fact this is the utmost need of the hour as in the present society, these important elements are considered as antiques minus value and taken a back seat. These aspect are taught here, after they are extracted from the prescribed Islamic Preaching very soon making the child realize that he is not a mere flotsam and jetsam in the current scenario but has power to swim against the stream to reach the shores.

Emphasis – Islam, results, Sports, Quality

Islam cannot be interpreted just as the name of a religion for a particular sect of the society. It is a guide to the whole man kind in it's complete form and hence divinely impeccable. Laying emphasis in practicing this would add beauty and luster to one's personality that helps a person to elate here and in the here after . Being sure of this we strongly recommend the Islamic way of life in world and deed. Scaling these heights positivity in results becomes inevitable that also gets quality as an added ingredient.

Sports serve as a healthy recreation from the routine. To make it a major part of the daily chore one needs professional approach to get trained. We enable the children to avail this by providing them coaching in various sports like cricket, football, throw ball etc. we see that sports in disguise will also form certain traits in children like discipline, team spirit, self confidence and to compete for good
